

Project Design Phase-I
Solution Architecture

Date	15 october2022
Team ID	PNT2022TMID22782
Project Name	Project–Smart farmer-IOT enabled smart Farming application.
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process—with many sub-processes—that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development , phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
